

DELUXE Hydrogen Inhaler

Making you Healthier !

Hydrogen Gas
Generator
using Advanced
PEM Water
Electrolysis

Producing High
Quality Hydrogen
Gas for Inhalation
& Hydrogen Water
for Drinking

The Elderly

DELUXE Hydrogen Inhaler

PRINCIPLE OF GENERATING HYDROGEN GAS

Use PEM pure water electrolysis technology, Electrolyzing water to produce pure hydrogen and pure oxygen, intelligently stripping pure oxygen, producing hydrogen with a purity of 99.996%.

Features:

- * High Effectiveness
- * Makes High Purity Hydrogen Gas for Breathing
- Makes High Grade Hydrogen Water
- * 7 Safety Functions in 1
- * SPE Plus PEM technology (Advanced)

DELUXE Hydrogen Inhaler

KUNZ

BENEFIT

- Reduce oxidative damage and inflammatory damage in disease.
- Reduce apoptosis and prevent abnormal angiogenesis.
- Enhance human immune function and improve prognosis.
- Remove malignant free radicals and nitrite anions.

DELUXE Hydrogen Inhaler

KUNZ

ADVANCED TECHNOLOGY

- KUNZ is Using PEM/SPE Technology for electrolysis, our inhalation machine makes 99.996% Pure Molecular Hydrogen.
- Simply attach a cannula and you can breath in pure H₂.
- Newly Designed hydrogen oxygen inhalation machine is state of the art in its field.
- Latest technology from DUPONT USA, which means significant Progress in efficiency
- Longer durability
- Dupont's original breakthrough was the PEM/SPE.

DELUXE Hydrogen Inhaler

KUNZ

CERTIFIED

KUNZ Brand Hydrogen generator is with CE, FCC certificate.

SAFE & LATEST TECHNOLOGY

Two chamber 7-Layers system with Platinum PEM (proton exchanging membrane) and Platinum Titanium electrode.

INCOMPARABLE PERFORMANCE

1 Channel: Superior Hydrogen Gas output channel

HYDROGEN FLOW

Maximum 300ml/Min

PURITY

99.996 % Hydrogen gas

USAGE

Maxium 8hrs continued use

GREAT MATERIAL

Platinum Titanium Electrode,
Platinum SPE PEM Membrane
Aluminium Body is more durable.

Modern High Class Design

Safety Features of the **DELUXE** Hydrogen Inhaler

KUNZ

1. Low
Water

Automatically cut off and alarm to add water.

2. Full
Water

Alarm when adding enough water.

3. Over
Pressure

Automatically cut off when the gas pressure is abnormal

4. Over
Heat

Automatically cut off when the temperature is over 60°C

5. Low
Temperature

Automatically cut off when the temperature is below 0°C

6. UnBalance

Automatically cut off when the Machine Is Tipped Over

7. Water
Quality

Inspects the Quality of the Water

8. Filter

Flashing icon when the filter needs to be replaced

9. Current
Display

Display working current value and hydrogen output
