- ▶ Hydrogen is one of the best natural antioxidants, so water added with it has a strong reducing function, neutralizing reactive oxygen species (free radicals) in the body's blood and cells.

# DRINKING HYDROGEN WATER

“I have been drinking hydrogen-rich water myself for years, It is not an overstatement to say that hydrogen’s impact on therapeutic and preventive medicine could be enormous in the future.” ... Atsunori Nakao, MD, PhD, a research associate professor of surgery at the University of Pittsburgh.

# FREE RADICAL DAMAGE PREVENTED BY HYDROGEN

In the three and a half years since the first Hydrogen paper was published in Nature medicine, more than 1000 Original papers have been published in leading biological / medical journals, With such cumulative knowledge, beneficial biological effects of hydrogen is definitely indisputable. Hydrogen not only has anti-oxidative stress effects, but also displays various other anti-inflammatory and anti-allergic effects.

Hydrogen combines with Free radicals to prevent cellular damage and destruction and transform into safe and harmless water to be discharged from the body.

# PURE HYDROGEN WATER IS NATURE'S STRONGEST ANTI-OXIDANT

Drinking 1.5 Liters of Pure Hydrogen Water has the same antioxidant effects as consuming fruits and vegetables as below:

It is the same benefits of anti oxidant you will get from eating 756 bananas, or 516 Apples, or 38 Carrots, or 45 Spinach or 3.7 Pumpkin. -The comparison of values was made by measuring beta carotene content in fruits and vegetables.-

**Research results from Japan's Shitama University Professor Hatana Gyazuki: based on data with only 550 ppb (parts per billion) of hydrogen content.**

Our **KUNZ HYDROGEN BOTTLE** can produce 1200 ppb (parts per billion) hydrogen content in your water compare to the chart which is based only at 550 ppb. Our ppb capacity is more than double that means you get more anti oxidant EFFECTS!
